

Edge-Worker Vacuum Stand

At last a truly sturdy and strong vacuum stand with a real suction cup and plenty of holding power, even for porous substrates! All you have to do is bolt it down and connect the air line. Your operators won't trip over clumsy feet or drop work due to inadequate suction.

You can use it as is or we will customize as needed if you are running a unique shape.

Give us a call, we'd like to build one for you!

This unit is made in Holland, Michigan. Please see reverse for technical specifications.

EDGE-WORKER VACUUM STAND

Edge-Worker Vacuum Stand

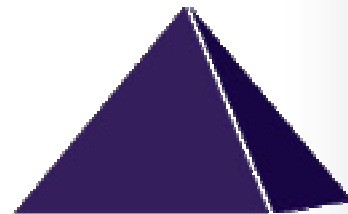

- 12" diameter suction cup provides plenty of holding power.
- Optional support ring with urethane bumpers adds support for over-hung loads. This can be made-to-order for unique shapes and removes with only three bolts.
- 1.5" diameter shaft and flange bearings provide smooth rotation and stiffness.
- Pneumatic rotary ball bearing coupling for long life.
- Large pneumatic suction generator provides the strength and holding power you need for any job.
- Cartridge-style debris filter protects the suction generator.
- Pneumatic brake with teeth engagement completely locks load in place.
- Pneumatic filter/regulator and gauge and water trap.
- 3/16" steel tower with 3/8" steel base provides a very stable structure and a narrow footprint so the operator doesn't trip over legs.
- 1/2" anchor holes and leveling screws included.

- Dual station remote foot pedal with brake and suction controls feature heavy-duty rocker-style pedals and woven stainless steel strain reliefs to withstand abuse.

Options Include:

- Custom work height
- Custom fit support rings
- Extra suction cups
- Motorized rotation
- Vertical raise and lower to lift off rollers
- Custom base designs
- Custom paint color
